Dependable markers for important jobs

Dependable Markers for Important Jobs

We believe markers should be reliable and functional work tools, and not commodities made to be disposable and cheap.

People on the job cannot afford the aggravation of inferior quality; therefore, we pay attention to design details and use superior components. We put in writing, in this catalog, how much paint or ink each marker contains, and we do not skimp on fill quantity or materials.

As a small business rooted in our local community, we care about the environment and doing things right. Part of the answer is making sure markers last longer. Many have replacement tips so you can use all available paint inside each marker. The *U-Holder* prevents marker tips from drying out. *Greenlabel* paint reduces environmental impact.

More can be done. Moving forward from here calls for creativity, smart design, and responsible innovation. No doubt this is a challenge, but we have a sincere passion for what we

do, and we will dedicate time and resources to continuously reducing our product's environmental footprint.

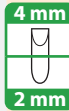

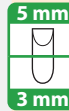

In the past 20 years our customers, employees and vendors have helped us grow by providing suggestions, encouragement, and perspective. Now more than ever, we need your feedback.

We are grateful for your business, and rest assured we will continue to work on providing you with top quality products and value.

Important Information

Suggestions and technical information provided in this catalog should be confirmed by testing and should not be used as specifications, because applications may vary. Our Technical Department will be happy to work with you and help you select the best product for your application.

A10 MARKER

Great Performance
Great Value

A10 is our best-selling marker, found in factories and in toolboxes all over the world. It makes the job easier, thanks to uncompromising quality components, a full barrel of paint, and industrial design.

Xylene-free liquid paint dries in 30 seconds and is resistant to water, weather, oils and solvents.

Replacement tips allow you to use all the paint inside

each marker, save money and help prevent waste.

A20 MARKER

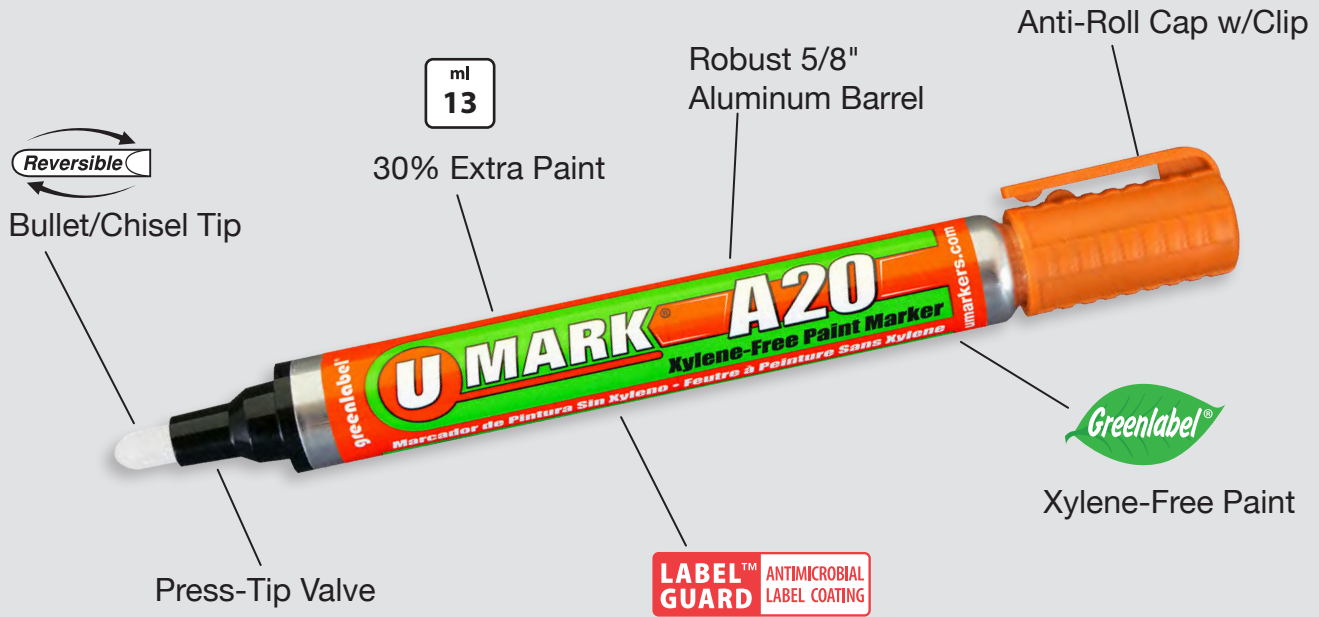

Superior by Design

A20 was engineered for advanced performance and dependability.

- Highly pigmented, bright paint resists most solvents and oils.
- A20 holds 30% more paint for fewer trips to the store room, better value and less waste.
- Versatile Bullet/Chisel Tips are made of stronger material to withstand repetitive marking.
- Label Guard™ Anti-Microbial label coating reduces infection risks when markers are shared.

A20 Paint Marker with Extra Paint

★ **Ideal for Upgrading Factory & Inspection Marking Operations**
Harsh Job Environments • Large Volume Marking

Greenlabel® Paint is better because it is made from premium ingredients, and has bright, visible colors, even when marking on dark surfaces. It won't fade or smudge, it's easy to apply and dries in 30 seconds.

W20 Permanent Paint Marker

Top Level Performance

W20 water-based acrylic paint delivers permanent, fade-resistant marks, along with low VOCs and reduced environmental impact. Don't confuse "water-based" with "wimpy" as W20 performs consistently better than its competitors (better colors, better outdoor resistance, lower VOCs).

Industrial Paint for Demanding Jobs

100P and 130P contain Industrial Paint designed for demanding applications on difficult to mark, rusty or oily surfaces, indoors or outdoors.

With about a minute dry time and a high pigment content, our Industrial Paint resists moisture, fading and chipping.

100 CHP Certified High Purity Paint Marker

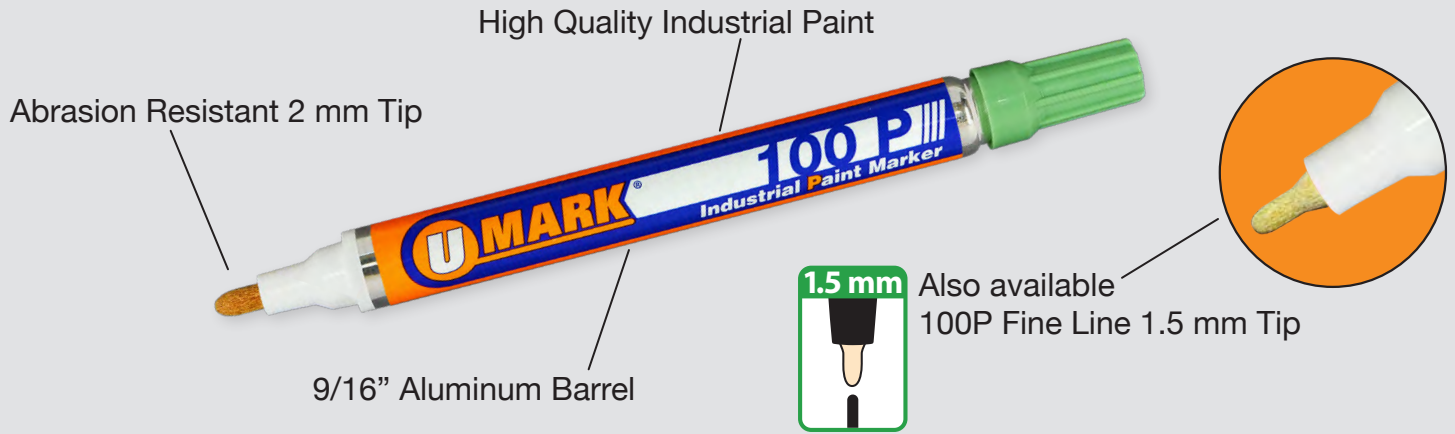

★ Ideal for General Purpose Marking in Nuclear, Aviation & Defense Applications

- Certified High Purity paint meets U.S. Dept. of Energy RDT-F7-3.7-5.1 specification, and prevents corrosion of stainless steel and other alloys.
- Contains less than 300 ppm aggregate of metals and sulphur, and less than 200 ppm aggregate total halogens.
- Each lot of paint is certified and a lot number is printed on each marker label.

REFILLABLE METALHEAD®

Sustainable and Frugal

Sustainability and care for the environment go hand in hand with frugality. This philosophy also applies to the Metalhead Refillable Paint Marker.

Metalhead features heavy-duty, replaceable steel tips for marking rough and difficult surfaces, extremely durable and refillable HDPE bottles, and stubbornly permanent paint.

When your MH or MH2 marker runs out of paint, use MH Paint Refill (with a convenient pouring spout) to replenish the 2 oz bottle, reduce unnecessary waste and save money.

Mix different colors of MH Paint and make your own, virtually unlimited color palette.

Performance Meets Durability

Rely on U-Mark's premium inks for proven performance on difficult surfaces and consistently good indoor/outdoor durability.

PHD earned its title by being the best marker available to mark animal tags and difficult plastic surfaces.

Tekmark has fast dry-time, excellent performance on wood and plastics, and superior outdoor durability. It's a favorite marking tool for surveyors,

engineers, farmers, and shipping room workers because the marks are permanent.

M3 is a versatile all-purpose marker that has convenient features such as a reversible bullet/chisel tip and fast drying permanent ink.

PHD Plastics Marker

Temporary Marking

Auto factories worldwide use U-Mark temporary markers to identify work-in-process parts and inventory, or to mark re-work items. Auto dealers, auctioneers and repair shops use them to advertise products or for marking vehicle parts. Washoff and Dr. Mark paints have been designed to work on difficult, non-porous surfaces without affecting removability or the surface being marked*.

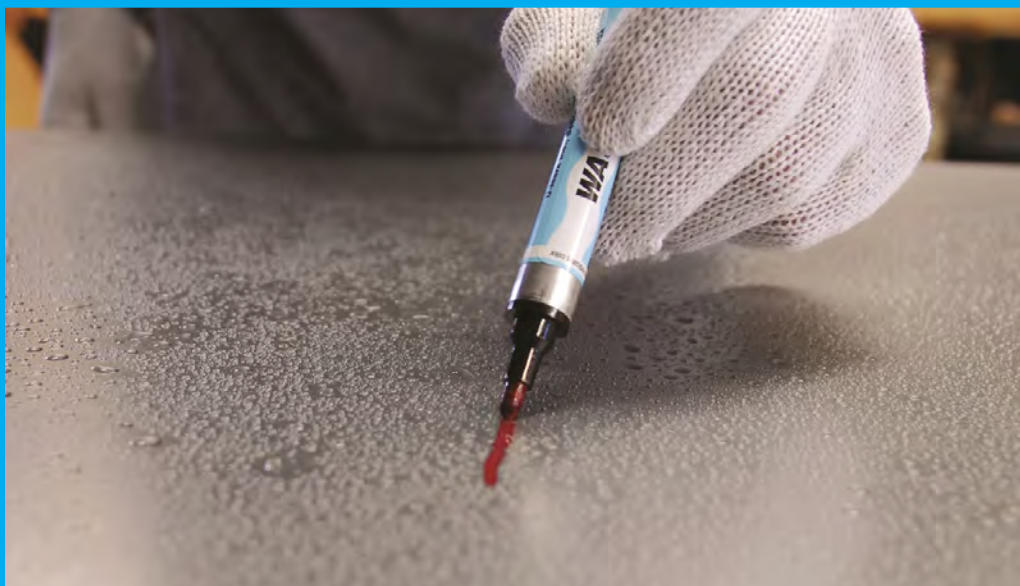

DR. MARK®

Some call it “Doctor Mark” – DR actually means... Detergent Removable! Marks are removable with alkaline detergents with a pH of 10 or higher, or with Windex. After removal, marks leave no ghosting, bleed through or adverse effects on metal’s coatings, so that parts can be primed and painted.

WASHOFF®

Marks made with Washoff are water removable without leaving a halo. May be used on slightly wet or oily surfaces in assembly, stamping and metal fabrication. The tips’ heavy duty Polyester material reduces fluid absorption from the surface being marked.

*Note: surface characteristics may vary. Always test before using. Paints may be permanent on porous surfaces.

The U-Phase Revolution

A simple, ingenious idea that has revolutionized the way electricians mark wire (US Patent 7,320,553).

When electricians see the U-Phase for the first time, it's love at first sight, because they understand this marker will make their life easier.

Using U-Phase, electricians can mark and phase panels in seconds, a faster and easier process than using vinyl tape.

In addition, U-Phase has a much lower environmental impact than vinyl tape: one U-Phase marker can mark up to 675' of #6 AWG wire, which is more than 10 times longer than one 66' roll of electrical tape, at a fraction of the cost.

U PHASE Wire Marker

US Patent 7,320,553

Permanent, quick-drying paint resists abrasion, moisture, dirt, oil and UV light.

Patented 7 mm Tip Marks up to #6 AWG Wire

5/8" Aluminum Barrel

Adheres to clean sheath permanently. Faster, easier to apply than vinyl tape!

★ **Ideal for** Phasing of Electrical Panels • Color Coding, Identifying, Wiring Circuits
Marking Computer & Telephone Cables • Automotive Wires
