

Some marking jobs require a steel tip because the surfaces marked are just too dirty, hot, oily or gritty for a felt tip to leave a legible mark. Metalhead® excels in these jobs due to its unique steel ball point tip. Filled with stubbornly permanent paint, Metalhead® will mark on tough surfaces such as concrete, brick, damp lumber, rusty and greasy metals. Ideal for outdoor use in steel yards, recycling centers, construction sites and chemical plants. Paint dries to a high gloss in about 10 minutes. Temperature marking range of -50° to 250° F (-46° to 121° C).

## Metalhead® Refillable Paint Marker

- 2 oz. squeezable plastic bottle is refillable.
- Paint is light-fast, weather and water resistant, and withstands many industrial chemicals.
- Unique spring loaded ball point tip produces thick, bright marks that will not chip or fade.
