

The ST-24 cuts stencils and signs in an almost unlimited amount of fonts and symbols with an easy to use Windows based software.

ST-24 Electronic Stencil Cutter

- **Simple and cost effective**

CutEngrave™ Stencil & Sign software is simple to use and is written with industrial shipping room users in mind. Comes with 23 standard stencil fonts, and symbols. You may import any TrueType font. Quick and easy automatic cut settings are controlled straight from the stencil cutter keypad.

- **Versatile**

Uses a carbide blade that has up to 600 grams of cutting force. A wide variety of stencil and sign materials can be cut on the large 24" cutting bed at speeds up to 65 ips.

- **Stencil Materials**

From Ultra-Cut II and Synthetic Stencil Board to magnetic and vinyl, you can cut projects from simple to the most intricate.

Ultra Cut II is a clay coated polyethylene material with a repositionable adhesive backing. Adheres to curved surfaces, may be re-used multiple times, and is resistant to stencil inks.

SSB is a 10-mil, high density synthetic stencil board attached to a heavy backing, with excellent ink absorption.
