Subject: Registration, Evaluation and Authorization of Chemicals Regulation (EC 1907/2006) (“REACH”) for U-Mark Products

To Whom It May Concern:

Since U-Mark, Inc. is not a European Entity (we neither manufacture nor import substances into the EU), we are not subject to the registration requirements of REACH.

As importers of our products, our independent distributors are responsible for registering any substances imported over specified quantities levels. Based on Article 7(2) of the European REACH regulations all our markers are exempt from the registration requirements because the total quantity imported in the EU market is less than 1 ton per year.
